Skills

Programming Languages: PHP, Python, C#, Dart, SQL, JavaScript

Web development: HTML, CSS, React.js, Flask

Mobile & Cross-Platform: Flutter, .NET MAUI, Android Studio

Tools & IDEs: Git, VS Code, Visual Studio Community, Arduino IDE

Cloud & Backend: Firebase, Supabase, AWS, Google Cloud, SQL Server

Productivity: Microsoft Office Suite such as Word, Excel, PowerPoint

Experience

Test Product Engineering Intern

April 2025 – July 2025

STMicroelectronics Inc. – Test Product Engineering Department

- Built an internal inventory tracking system using Flask, HTML/CSS, and JavaScript, addressing limitations of legacy tools by improving reliability, data handling, and user experience.
- Created a web-based application for department use, improving the efficiency of tracking and reporting processes.
- Automated the generation of Excel reports and visualizations from unstructured data using Python, Pandas, Matplotlib, and Openpyxl—reducing manual workload and improving data accuracy.
- Developed scripts for handling CSV-based data flows in the absence of a formal database system.
- Participated in client prototype reviews and applied agile-inspired feedback loops to iteratively refine the tool.
- Gained exposure to manufacturing tools, Power BI, and company process standards, aligning with the OJT training plan outcomes.

•

Education

Mapua Malayan Colleges Laguna

2021 - Present

Bachelor of Science in Information Technology (Graduating)

Pulo-Diezmo Road, Cabuyao, Laguna

- Cumulative GWA: 1.681
- Dean's Lister (2021 – 2024)

Projects

SCCare+

Flutter | Dart | Supabase | Firebase Authentication | React |

- A mobile health app designed to modernize healthcare services in local health centers. It streamlines appointment scheduling, enables secure OTP login, and facilitates real-time patient-provider communication. It also includes a web-based admin dashboard for managing appointments and monitoring patient data.

Rock-Paper-Scissors Arduino Game

Arduino Uno | Wemos ESP32 | C++ | C# | .NET MAUI

- An interactive game for children that uses an Arduino-based controller and a screen interface to display the game. Implement logic to recognize player input and determine game outcomes, reinforcing basic programming and hardware interaction skills.

•

Certifications

- Google IT Support (July 2025)
- CompTIA IT Fundamentals (ITF+) Certification (*July 2024*)
- AWS Academy Graduate - AWS Academy Cloud Foundations (*Nov 2023*)
- Google Cloud Essentials (*Aug 2023*)
- Technical Support Fundamentals (*Jun 2023*)
- CCNA: Introduction to Networks (*Nov 2022*)
